Full Stack Developer with strong experience in Laravel and Node.js, and some knowledge of React.js for building user interfaces. Skilled in creating secure web applications, managing databases, and integrating APIs. A reliable team player who focuses on delivering quality projects on time and keeping up with new technologies.

## Technical Skills

PHP | Laravel | JavaScript | Jquery | HTML | CSS | Bootstrap | API Development | Api's Integration | Git & GitHub | MVC Frameworks | MVT Frameworks | Node JS | Python | TensorFlow | FastAPI | MySQL | NoSQL

## Soft Skills

Effective Communication | Active Listening | Positive Body Language | Conflict Resolution | Confidence | professionalism

## Experience

Dec 2023 - Present

### Full Stack Developer

Zetaver, Lahore, Pakistan **(Remote)**

As a Full Stack Developer at Zetaver, I build secure and scalable backend systems using Node.js and Laravel. I also create dynamic and user-friendly interfaces with React, making sure websites and apps work smoothly on all devices. I design and manage databases using MySQL and MongoDB, ensuring data is stored and retrieved efficiently. I also integrate third-party APIs to add extra features and deploy applications on AWS to keep them running fast and reliably. I work closely with designers, product managers, and other developers to create high-quality and innovative solutions. My goal is to write clean and maintainable code, follow best practices, and keep learning new technologies to improve my skills.

Apr 2022 - Dec 2023

### Laravel Developer

Febtechsol, Sialkot, Pakistan **(onsite)**

At Febtechsol, I built and maintained web applications using Laravel, ensuring they were fast, secure, and easy to use. My job included integrating APIs for real-time features, optimizing databases for better performance, and following security best practices. I worked closely with designers and developers to deliver high-quality projects. I also reviewed code and tested applications to make sure they met high standards. My work helped create successful and scalable web solutions.

May 2021 - Apr 2022

## Laravel Developer

SharaWebSol, Sialkot, Pakistan **(onsite)**

As a Laravel Developer at SharaWebSol from May 2021 to May 2022, I specialized in crafting high-performance web solutions. I translated client requirements into efficient code, ensuring seamless user experiences. I actively contributed to the entire development lifecycle, adhering to industry standards and integrating innovative features. My tenure was marked by a commitment to excellence and a passion for delivering impactful projects.

## Education

### University of Sialkot

Bachelors in Science , BS Software

Engineering CGPA: 2.98/4

## Projects

### TradifyFx CRM

Laravel Specialist Developed a state-of-the-art CRM platform exclusively using Laravel, tailored for the trading industry to empower brokers (blockers) in managing multiple user investments. Key achievements include Admin Capabilities Enabled brokers to handle and monitor user investments with comprehensive administrative tools. Real-Time Trading Integration Seamlessly integrated ARK API for real-time trading functionality and up-to-the-minute market data. User Management Created intuitive interfaces for managing user profiles, investment portfolios, and transaction histories. Secure and Scalable Implemented robust security measures and scalable architecture to protect sensitive financial data and support growth.

### Xdragon

XDragon is a project I built for our company. It helps manage a system called a matrix, where people can buy vouchers and join. Once they're in, they can move around a bit before leaving. The project uses smart rules to make sure everyone gets a fair turn and can leave when they need to.

### HozlaBit - Innovative Crypto Investment Platform

Developed Hozlabit, an online platform for entrepreneurs, using Laravel to build a scalable backend. Key features include user authentication, access control, and data management for a secure and user-friendly experience. Collaborated with a team to integrate frontend components, optimize responsiveness, and improve user experience through ongoing development and feedback.

### First Choice Anderson

I led the development of a bespoke appointment booking application designed exclusively for a particular hospital. Harnessing the power of Laravel, our team meticulously crafted a robust backend infrastructure to facilitate seamless scheduling between patients and doctors. Beyond mere functionality, we prioritized user engagement by integrating comprehensive messaging and notification features. This ensured timely reminders and facilitated smooth communication, enhancing the overall patient experience.

Through collaborative efforts, we successfully delivered a highly tailored solution that not only met but exceeded the hospital's expectations. This stands as a testament to our commitment to leveraging innovative technology to streamline healthcare processes and improve patient outcomes.

## AamExpress

As a Laravel Developer, I contributed to AamExpress, a single-page application (SPA) built in React. My primary role was to develop and update APIs in Laravel to support the front-end functionality. I worked extensively on optimizing the API endpoints to ensure seamless data flow and improve the overall performance of the application.
